7. Search For Facility API

This API will provide you with a list of facilities present in the HFR system based on the search criteria. It returns the basic details of the facilities like Facility Id, Name, demographic details, etc.

Please note:

- You can either search for a particular facility, by sending in the facility Id, or with search criteria.
- If you search with facility Id, then other search parameters will not be considered.
- If a search is performed without a facility id, then you must pass in all the required parameters for a successful search.
- The data needs to be passed in the required format as mentioned for each field.
- Certain demographic details need to be filled in as LGD Codes (Local Government Directory). Please visit. https://lgdirectory.gov.in/ for more information.
- The API performs fuzzy match on facility name and exact match on all the other attributes.
- It returns the result in pagination format. By default, it will return the first page consisting of 10 records
- unless specified otherwise.
- Please note this API is to be used to find the facilities registered, so that no duplicate facilities are created by the other APIs.

Parameters:	Required	Description	Data type	Format if any
ownershipCode	Yes (if facility Id not present)	Ownership of the facility to be searched	String	Accepted codes as specified in get-master- data API with type='OWNER'
stateLGDCode	Yes (if facility Id not present)	State of the facility. The value should be from LGD	String	LGD Code
districtLGDCode	No	District of the facility. The value should be from LGD	String	LGD Code
subdistrictLGDCode	No	Sub district of the facility. The value should be from LGD	String	LGD Code
pincode	No	Pin code of the facility. This needs to be a valid 6 digit value.	String	6-digit number
facilityName	Yes (if facility Id not present)	Name of the facility being searched. This value can be either full or partial name	String	Alphanumeric string
facilityId	No	12-character Facility Id allotted to each facility at the time of submission. If this value is present in search call, then only the respective facility details will be returned.	String	Id generated by HFR system.
page	No	The page number of which results need to be seen. Default value is 1	integer	Integer number
resultsPerPage	No	Number of facilities what will come in one page. Default value is 10.	integer	Integer number

9. Retrieve Professional Document List API

Users will get all the document list with their identifier which can be used in upload document API mentioned below.

Add the accessToken received from the **HPRID Gateway Token** API for authorization.

Note: Append tokenType Bearer before the access token, give a space and then add your access token as shown below.

Key: Authorization
Value: Bearer<Leave Space><Your Access Token goes here>
