

AYUSHMAN BHARAT DIGITAL MISSION

Health Facility Registry APIs

Health Facility Registry APIs

Welcome to Health Facility Registry's API Documentation. We've designed this document to help integrators and HFR users fully understand and integrate our API for a seamless and easy deployment. These APIs enable you to search and create a Facility with complete set of data attributes.

We've listed the APIs, their required parameters, and their example requests and responses in this document for easy understanding. The easiest way to start using the HFR APIs is by trying them out in Postman (a free tool that helps developers run and debug API requests) or our Swagger UI (<https://apihspbx.abdm.gov.in/v4/int/swagger-ui/index.html#/>)

Our APIs are based around REST architecture and use the basic HTTPS request methods. Our APIs accept JSON- encoded body requests and return data in the same form.

The APIs should be integrated and tested out in sandbox, prior to requesting access for production details.

Getting Started

First, you will need to whitelist the Public domain of HFR sandbox to integrate and access the APIs. Please make note of the details

- Domain: apihspbx.abdm.gov.in

Document and API Usage Guidelines

- Our APIs use the basic HTTP request codes: POST and GET.
- Each API has been described in detail with the attribute description, format followed if any and mandatory or not.
- There are certain APIs which have Authorization as a Header which will need an access-token.
- The APIs and related details are also present on our swagger interface (<https://apihspbx.abdm.gov.in/v4/int/swagger-ui/index.html#/>).
- We have also created master APIs where you can check what all master data sets are available in the HFR system and see corresponding values as well. These are present under the "Utilities" tab on swagger link.

1. SEARCH FOR FACILITY

1.1 Search API

This API will provide you with a list of facilities present in the HFR system based on the search criteria. It returns the basic details of the facilities like Facility Id, Name, demographic details, etc.

Please note:

- You can either search for a particular facility, by sending in the facility Id, or with search criteria.
- If you search with facility Id, then other search parameters will not be considered.
- If search is performed without facility id, then you must pass in all the required parameters(OwnershipCode, StateLGDCode, FacilityName) for a successful search.
- The data needs to be passed in the required format as mentioned for each field.
- Certain demographic details need to be filled in as LGD Codes (Local Government Directory). Please visit <https://lgdirectory.gov.in/> for more information.
- The API performs fuzzy match on facility name and exact match on all the other attributes.
- It returns the result in pagination format. Based on the page(Minimum value is 1) and ResultsPerPage(Minimum value is 10) values , the result will be populated.

- Please note this API is to be used to find the facilities registered, so that no duplicate facilities are created by using the Create API

Parameters:

Params	Required	Description	Data type	Format if any
ownershipCode	Yes (if facilityId not present)	Ownership of the facility to be searched	String	Accepted codes as specified in get-master-data API with type='OWNER'
stateLGDCode	Yes (if facilityId not present)	State of the facility. The value should be from LGD	String	LGD Code – checks against the list of states LGD code
districtLGDCode	No	District of the facility. The value should be from LGD	String	LGD Code
subdistrictLGDCode	No	Sub district of the facility. The value should be from LGD	String	LGD Code
pincode	No	Pin code of the facility. This needs to be a valid 6 digit value.	String	6-digit number
facilityName	Yes (if facilityId not present)	Name of the facility being searched. This value can be either full or partial name	String	Alphanumeric string
facilityId	No	12-character Facility Id allotted to each facility at the time of submission. If this value is present in search call, then only the respective facility details will be returned.	String	Id generated by HFR system. Starts with 'IN' and the length is 12 characters.
page	Yes	The page number of which results need to be seen. Minimum value to be passed is 1	integer	Integer number. Should not be passed as String.
resultsPerPage	Yes	Number of facilities what will come in one page. Minimum value to be passed is 10.	integer	Integer number. Should not be passed as String.

Request Method: POST

Headers:

Content-Type application/json
 Accept application/json
 Authorization Bearer <access-token>

Sample 1 :

Request Body

Request Body	{ "ownershipCode": "", "subDistrictLGDCode": "", "pincode": "", "facilityName": "", "facilityId": "IN3310001245", "page": 1, "resultsPerPage": 10, "stateLGDCode": "", "districtLGDCode": "" }
Response	{ "facilities": [{ "ownershipCode": "", "subDistrictLGDCode": "", "pincode": "", "facilityName": "", "facilityId": "IN3310001245", "page": 1, "resultsPerPage": 10, "stateLGDCode": "", "districtLGDCode": "" }] }

	<pre> "ownership": "PRIVATE", "systemOfMedicineCode": "M,D", "systemOfMedicine": "Modern Medicine(Allopathy),Dentistry", "facilityType": "Dental College", "stateName": "Tamil Nadu", "stateLGDCode": "33", "districtName": "Chennai", "districtLGDCode": "568", "subDistrictName": "Ambattur", "subDistrictLGDCode": "5700", "villageCityTownName": "NA", "villageCityTownLGDCode": "", "address": "No 510 south street koyambedu, ", "pincode": "600107", "latitude": "27.907283445090215", "longitude": "78.32989878869023", "facilityId": "IN3310001245", "facilityName": "ABC Hospital", "facilityStatus": "Submitted", "ownershipCode": "P", "facilityTypeCode": "OTH" }], "message": "Request processed successfully", "totalFacilities": 1, "numberOfPages": 1 } </pre>
--	--

Sample 2

Request Body	<pre> { "ownershipCode": "G", "subDistrictLGDCode": "", "pincode": "", "facilityName": "h", "facilityId": "", "page": 1, "resultsPerPage": 10, "stateLGDCode": "33", "districtLGDCode": "" } </pre>
Response	<pre> { "facilities": [{ "ownership": "GOVERNMENT", "systemOfMedicineCode": "UN,H", "systemOfMedicine": "Unani,Homeopathy", "facilityType": "Unani Hospital/ Nursing Home", "stateName": "Tamil Nadu", </pre>

	<pre> "stateLGDCode": "33", "districtName": "Madurai", "districtLGDCode": "578", "subDistrictName": "Madurai South", "subDistrictLGDCode": "5841", "villageCityTownName": null, "villageCityTownLGDCode": null, "address": "Melur Main Road, Madurai, Tamil Nadu, India, ", "pincode": "630606", "latitude": "9.9479215", "longitude": " 78.1625445", "facilityId": "IN3310001107", "facilityName": "Meenakshi Mission Hospital", "facilityStatus": "Submitted", "ownershipCode": "G", "facilityTypeCode": "H" }], "message": "Request processed successfully", "totalFacilities": 1, "numberOfPages": 1 } </pre>
--	--

Sample 3

Request Body	<pre> { "ownershipCode": "G", "subDistrictLGDCode": "", "pincode": "", "facilityName": "", "facilityId": "", "page": 1, "resultsPerPage": 10, "stateLGDCode": "33", "districtLGDCode": "" } </pre>
Response	<pre> { "code": "HIS-422", "message": "Unable to process the current request due to some wrong data entered.", "details": [{ "message": "Required FacilityName Field is empty.", "code": "HIS-1070", "attribute": null }] } </pre>

2. ON-BOARD FACILITY WITH DETAILED INFORMATION

The following set of APIs is used to create and update facility information using detailed information attributes.

Please note:

- If a facility is being on-boarded with the following set of APIs, the order in which the APIs are being called should be maintained as instructed in the description.
- **If the facility is in Draft stage, you need to pass the Tracking Id, wherever mentioned, as the value for trackingId key**
- If the facility is submitted already and data is being updated using these APIs, you need to pass the FacilityId wherever mentioned.
- Please make note that if you are on-boarding your facility with these APIs (for the first time), the facility will be submitted and Facility Id will be generated only after you call all the necessary APIs and then finally the Submit API. It is of utmost importance that order of APIs be followed.

2.1 Basic Facility Information API

This is the first API that needs to be called for on-boarding your facility in HFR using APIs. With this, you can initiate the registration process in HFR and facility comes under Draft status.

If this API is called successfully, a Tracking Id is generated for your facility. This tracking Id becomes the unique identification number for your facility until you submit the request. Use this tracking Id as facilityId for all further updates in the APIs followed by this one.

Before you can start creating a facility using this API, you need to do the following two steps.

1. Create HPR Id—You need generate a Healthcare Professional Id (HPID) using your Aadhar or Driving Licence on <https://hspsbx.abdm.gov.in> . Please create your HPID as a Facility Manager. Once the Id is generated, please set a password as well.
2. Once you have the HPR Id and the password is set, head to the swagger page of HPR Id <https://apihspsbx.abdm.gov.in/v4/int/swagger-ui/index.html?urls.primaryName=HFR> Expand the “Authentication” tab and select “/v1/auth/authPassword” API. Please fill in the request body and execute this API. Save the “token” returned in the response as it will be used in header of HFR’s create API.

After this, you can start the process of facility creation in HFR using the APIs.

Please note:

- You have to pass in all the required parameters to create the API.
- The data needs to be passed in the required format as mentioned for each field.
- Certain demographic details need to be filled in as LGD Codes (Local Government Directory). Please visit <https://lgdirectory.gov.in/> for more information.
- The details you send for creation of facility should be unique and valid; else you will receive a Precondition Fail error.
- Depending on the value you provide in Facility Operational Status, the next API will be decided. If Operational Status is marked as Functional, then proceed with “Additional API”, “Detailed Information API” and finally “Submit API”. If Operational Status is anything apart from Functional, then proceed with Submit API directly.

Parameters:

Params	Required	Description	Data type	Format if any
facilityName	Yes	Name of the facility that is to be created in HFR	String	Alphanumeric string that starts with an alphabet.
ownershipCode	Yes	Ownership of the facility	String	Accepted codes as specified in get-master-data API with type='OWNER'
ownershipSubTypeCode	Yes	Ownership subtype of the facility	String	Accepted codes as specified in get-owner-subtype API
facilityAddressDetails	Yes	JSON object to capture demographic data of the facility		
country	Yes	By Default its India	String	Alphanumeric string that starts with an alphabet.
stateLGDCode	Yes	State of the facility. The value should be from LGD	String	LGD Code
districtLGDCode	Yes	District of the facility. The value should be from LGD	String	LGD Code
subdistrictLGDCode	Yes	Sub district of the facility. The value should be from LGD	String	LGD Code
facilityRegion	No	Area comes under Rural or urban	String	Contain Single Char value R/U
villageCityTownLGDCode	No	Village/Town of the facility. The value should be from LGD	String	LGD Code
addressLine1	Yes	Line 1 of the address of the facility.	String	Alphanumeric string accepted along with few special characters (.-,/()_) and min length is 5.
addressLine2	No	Line 2 of the address of the facility.	String	Alphanumeric string accepted along with few special characters (.-,/()_)
pincode	Yes	Pin code of the facility.	String	6 digit number
latitude	Yes	Latitude of the facility	String	Real Number ranging from -90.000000 to +90.000000 , with 1-6 decimal places.
longitude	Yes	Longitude of the facility	String	Real Number ranging from -180.000000 to +180.000000 with 1-6 decimal places.
facilityContactInformation	Yes	JSON object to capture contact details of the facility		
facilityContactNumber	No	Mobile number of the facility	String	Should be a valid 10 digit mobile number
facilityEmailId	No	Email of the facility	String	Proper format of email to be followed
facilityLandlineNumber	No	Landline number of the facility	String	Should be a valid landline number ranging between 6-8 digits
facilityStdCode	No	Std Code of the facility	String	Should be a valid std code with no more than 5 digits
websiteLink	No	Valid Website link of facility	String	Must contain Valid Link
systemOfMedicineCode	Yes	System of medicine followed by your facility.	String	Accepted codes as specified in get-master-data API with type="MEDICINE" . In case you have multiple systems of medicine, send a comma separated string of codes.
facilityTypeCode	Yes	Type of your facility as defined by HFR	String	Accepted codes as specified in fetch-facility-type API .
facilitySubType	Yes	Subtype corresponding to facility type as define by HFR	String	Accepted codes as specified in fetch-facility-sub-type API .

specialityTypeCode	Yes, based on the facility type provided	Whether facility offers Single or Multiple Specialities	String	Accepted codes as specified in get-master-data API with type='SPECIALITY-TYPE'
typeOfServiceCode	Yes, based on the facility type provided.	Type of services offered by facility	String	Accepted codes as specified in get-master-data API with type='TYPE-SERVICE' typeOfServiceCode not required if facility type is any of the following ('Diagnostic Laboratory (10,45)', 'Imaging Center (74,75)', 'Cath Laboratory (12,47)', 'Dialysis Center (13,48)', 'Blood Bank (9,44)', 'Pharmacy (11,46)') If facility type is any of the following,('Ayurveda Dispensary/ Clinic/ Polyclinic (OPD only) (17,52)', 'Unani Dispensary/ Clinic/ Polyclinic (OPD only) (20,55)', 'Siddha Dispensary/ Clinic/ Polyclinic (OPD only) (23,58)', 'Homeopathy Dispensary/ Clinic/ Polyclinic (OPD only) (26,61)', 'Sowa-Rigpa Dispensary/ Clinic/ Polyclinic (OPD only) (29,64)',) Then typeOfServiceCode – IPD is not applicable
facilityOperationalStatus	Yes	Whether your facility is currently operational or not	String	Accepted codes as specified in get-master-data API with type='FAC-STATUS'
facilityUploads	Yes	JSON Object to take facility Photographs		
facilityBoardPhoto	No	JSON Object to take details of Board Photograph		
name	No	Name of the board photograph	String	Alphanumeric string accepted along with few special characters (.,/()_)
value	No	Board photograph base64 value	String	Base 64
facilityBuildingPhoto	No	JSON Object to take details of Building Photograph		
name	No	Name of the Building photograph	String	Alphanumeric string accepted along with few special characters (.,/()_)
value	No	Building photograph base64 value	String	Base 64
timingsOfFacility	Yes, If facility operational status if Functional	JSON Object to capture timings of the facility—days when it is open and working hours		
workingDays	Yes	The day on which the facility is open/working.	String	Accepted codes as(MON, TUE, WED, THU, FRI) specified in get-master-data API with type='WORKING-DAYS'
openingHours	Yes	For the day as specified in working days, please mention the working Hours	String	Accepted format is 10:00 Am–2:00 PM or 24*7
facilityAddressProof	No	JSON object to capture the address proof details		Can take maximum upto 3 address proofs
addressProofType	No	Address Proof type that is being added.	String	Accepted codes as specified in get-master-data API with type='ADDRESS-PROOF'
addressProofAttachment	No	JSON Object of the Attachment details for the address proof		
name	No	Name of Document to be uploaded	String	Alphanumeric string accepted along with few special characters (.,/()_)
value	No	Valid Doc picture converted into base 64 value	String	Base 64

abdmCompliantSoftware	No	Valid software code to be linked	String	Accepted codes as specified in get Software-details API
anyOther	No	Valid Software code to be linked	String	Alphanumeric string accepted along with few special characters (.,/()_)

2.2. Additional information API

If your facility is Functional (i.e. facilityOperationalStatus=F) then this is the next API that you need to call. Please provide the tracking Id in the facilityId key below, to update the dataset against your Draft facility.

Please note:

- You have to pass in all the required parameters to create the API.
- The data needs to be passed in the required format as mentioned for each field.

Parameters:

Params	Required	Description	Data type	Format if any
trackingId	Yes	tracking id generated from basic information API	String	Valid Tracking Id starting with numeric digits
hasDialysisCenter	No	If facility have dialysis center	String	Accepted codes as specified in get-master-data API with type='GENERAL-INFO-OPTIONS'
hasPharmacy	No	If facility have pharmacy center		Accepted codes as specified in get-master-data API with type='GENERAL-INFO-OPTIONS'
hasBloodBank	No	If facility have bloodbank center	String	Accepted codes as specified in get-master-data API with type='GENERAL-INFO-OPTIONS'
hasCathLab	No	If facility have cath lab center	String	Accepted codes as specified in get-master-data API with type='GENERAL-INFO-OPTIONS'
hasDiagnosticLab	No	If facility have diagnostic center	String	Accepted codes as specified in get-master-data API with type='GENERAL-INFO-OPTIONS'
hasImagingCenter	No	If facility have imaging center	String	Accepted codes as specified in get-master-data API with type='GENERAL-INFO-OPTIONS'
servicesByImagingCenter	Yes, if imaging center is present	If facility have imaging center, provide the services offered and count of each	List	
service	No , Yes if Imaging Service Center Present	In servicesByImagingCenter, mention the code of the service offered	String	Accepted codes as specified in get-master-data API with type='IMAGING'
count	Yes, if a service is available	For every service that is offered, mention the count of equipments	String	A valid number
nhrrId	No	National Health Resource Repository Unique ID	String	Should be a valid NHRR ID
Nin	No	National Identification Number	String	Should be a valid NIN id
abpmjayId	No	Hospital Id as allotted by AB-PMJAY Hospital Empanelment Module.	String	Should be a valid AB-PMJAY Hospital Id
rohiniId	No	Rohini Id	String	Should be a valid Rohini Id
echsid	No	Unique id in Ex-Servicemen Contributory Health Scheme	String	Should be a valid ECHS Id.
cghsId	No	Unique Id in Central Government Health Scheme	String	Should be a valid CGHS Id.
ceaRegistration	No	CEA Registration Number	String	Should be a valid CEA registration number
stateInsuranceSchemeld	No	State Insurance Scheme ID	String	Alphanumeric string

    "errorStatus": null
}

```

2.3. Detailed information API

Use this API to provide detailed information about your facility. There are certain fields in this API, which are dependent on the facility type value and Additional Services available at your facility.

Please note:

- You have to pass in all the required parameters to create the API.
- The data needs to be passed in the required format as mentioned for each field.
- For each System of Medicine available at your facility, you need to provide information on whether any specialization/services are offered for that system of medicine.
- Attributes on Medical Infrastructure are dependent on Type of Service value and availability of Dentistry as system of medicine. (**Medical Infrastructure is mandatory for Dentistry.**)
- If the facility type is Pharmacy or if pharmacy services are available at the facility, then section on pharmacy details need to be updated.
- If facility type is blood bank or if blood bank services are available at the facility, then section on Blood bank details need to be updated.
- If facility type is Diagnostic Lab or if diagnostic lab services are available at the facility, then section on Diagnostic Services need to be updated.
- If facility type is Imaging Center or if imaging services are available at the facility, then section on Imaging Services details need to be updated.

Parameters:

Params	Required	Description	Data type	Format if any
trackingId	No	tracking id generated from basic information API	String	Valid Tracking Id starting with numeric digits
Specialities	Yes, Based on facilityType	List of specialities for each system of medicine offered by the facility	List	
systemOfMedicineCode	Yes	System of medicine codes as saved in Basic-Information API	String	Accepted codes as specified in get-master-data API with type='MEDICINE'
isSpecializationAvalaible	Yes	If the facility offers any specializations or services for this system of medicine	String	Y / N as accepted value
Specialities	Yes, if specializations/ services are offered for this system of Medicine	Codes of all the specializations/ services offered for this system of medicine	List of String type	Accepted codes as specified in the get-specialities API with respect to a system of medicine
countIPDBedsWithoutOxygen	No	Number of IPD Beds (except ICU beds) without oxygen facility	Integer	Numeric Value

countIPDBedsWithOxygen	No	Number of IPD Beds (except ICU beds) with oxygen facility	Integer	Numeric Value
countICUBedsWithVentilators	No	Number of ICU beds with Ventilators	Integer	Numeric Value
countICUBedsWithoutVentilators	No	Number of ICU beds without Ventilators	Integer	Numeric Value
countHDUBedsWithVentilators	No	Number of HDU beds with Ventilators	Integer	Numeric Value
countHDUBedsWithoutVentilators	No	Number of HDU beds without Ventilators	Integer	Numeric Value
totalNumberOfVentilators	No	Total Number of Ventilators	Integer	Numeric Value
countDayCareBedsWithoutOxygen	No	Number of Daycare beds without oxygen facility	Integer	Numeric Value
countDayCareBedsWithOxygen	No	Number of Daycare beds with oxygen facility	Integer	Numeric Value
totalNumberOfBeds	Yes, Based on facilityType	Total count which should be equal to or greater than sum of all the above components with beds	Integer	Numeric value
countDentalChairs	No	Number of Dental Chairs	Integer	Numeric Value
pharmacyDetails	Yes, if facility type is Pharmacy	Section to capture Pharmacy Details		
isJanAushadhiKendra	No	Is your facility a Jan Aushadhi Kendra?	String	Y / N as accepted value
janAushadhiKendraId	Yes, if facility is Jan Aushadhi Kendra	Provide jan Aushadhi Kendra Id	String	Alphanumeric value
DrugLicenseNumber	Yes, if facility type is Pharmacy	Mention your Pharmacy Registration Number	String	Alphanumeric value
pharmacyGstinNumber	No	Mention GSTIN Number	String	Alphanumeric value
pharmacistRegistrationNumber	No	Mention Pharmacist registration number	String	Alphanumeric value
bloodBankDetails	Yes, if facility type is blood bank	Section to capture blood bank details		
isFacilityRegisteredInERaktkosh	Yes	Is your facility registered in e-Raktkosh	String	Y / N as accepted value
eRaktoshId	Yes, if facility is registered in e-Raktkosh	Provide e-Raktkosh Id	String	Alphanumeric value
bloodBankLicenseNumber	Yes	Mention your Blood Bank Registration Number	String	Alphanumeric value
bloodStorageCenters	No	Is there any Blood Storage Centres associated with your Blood Bank	String	Y or N as accepted value
storageCentersCount	Yes, if storage centers are associated with your blood bank	Count of Blood Storage Centres	String	Numeric value
bloodCollectedPerAnnum	No	Please indicate the number of blood units collected per annum	String	Numeric value
bloodRequiredPerAnnum	No	Please mention existing requirement of Blood per annum	String	Numeric value
imagingServices	Yes, if facility type is Imaging center	Section to capture Imaging Services details	List	
service	Yes	Code of imaging service that is offered by the facility	String	Accepted codes as specified in get-master-data API with type='IMAGING'
count	Yes, if a service is offered	For every service offered in Imaging center, please mention the count of equipments available	String	A valid number
diagnosticServices	Yes, if facility type is Diagnostic Lab	Please mention the codes of diagnostic services available at your facility	Comma Separated List of Strings	Accepted codes as specified in get-master-data API with type='DIAGNOSTIC'

2.4 Submit Facility Details API

This is the final step towards on-boarding your facility in HFR. This API needs to be called if you wish to submit your facility details and let the application proceed for verification. If this API is not consumed, your facility remains in Draft stage only.

Please note:

- You have to pass in all the required parameters to create the API.
- The data needs to be passed in the required format as mentioned for each field.
- You will need to pass in x-hpird-auth token in header for this API. To get the value of this token, head to the swagger page of HPR Id <https://apihspsbx.abdm.gov.in/v4/int/api/swagger-ui.html#/> Expand the “Authentication” tab and select “/v1/auth/authPassword” API. Please fill in the request body and execute this API. The token received in the response is the value you need to save and send here.

Parameters:

Params	Required	Description	Data type	Format if any
trackingId	Yes	tracking id generated from basic information API	String	Valid Tracking id starting with numeric digits
sourceOfInformation	No	Source of information of this facility	String	Should be valid data source provide by HFR team. If you leave this field empty, then your facility will be considered as Submitted entity.
sourceUniqueID	No	Facility Unique Id as exists in HRP or data source	String	

Specifications:

URL: https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/submit-facility

Method: POST

Headers:

Content-Type	application/json
Accept	application/json
Authorization	Bearer <access-token>
x-hprid-auth	<token> (as derived in Step 2)

Sample 1

Request Body:

```
{
  "trackingId": "",
  "sourceOfInformation": "",
  "sourceUniqueID": ""
}
```

Response:

```
{
  "facilityId": null,
  "status": "Not Created",
  "message": "Facility not created. Please check the errors",
  "errorStatus": [
    {
      "field": "facility Id",
      "message": "facilityId is invalid"
    }
  ]
}
```

Sample 2 Request Body:

```
{
  "trackingId": "820",
  "sourceOfInformation": "",
  "sourceUniqueID": ""
}
```

Response:

```
{
  "facilityId": " INAN000167",
  "status": "Created",
  "message": "Facility created successfully. Please save the Facility Id returned.",
  "errorStatus": null
}
```

3. Utility APIs

3.1 Master Types

Using this API you can get the list of types of master data sets that are used in HFR.

Please note:

- This is a basic GET API and no parameter is required.
- The response gives a type and description with respect to each type of master data set.
- The “type” of master thus provided shall be used to fetch the details in Master Data API.

Specifications:

URL: <https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/get-master-types>

Request Method: GET

Headers:

Content-Type	application/json
Authorization	Bearer <access-token>

Response:

```
{
  "masterTypes": [
    {
      "type": "MEDICINE",
      "desc": "System Of Medicine"
    },
    {
      "type": "OWNER",
      "desc": "Ownership Of Facility"
    },
    {
      "type": "OWNER-SUBTYPE",
      "desc": "Ownership Subtype Of Facility"
    },
    {
      "type": "CENTRAL-GOVERNMENT",
      "desc": "Ministries under Central Government"
    },
    {
      "type": "PROFIT-TYPE",
      "desc": "Types of Profit Facilities"
    },
    {
      "type": "NON-PROFIT-TYPE",
      "desc": "Types of Non Profit Facilities"
    },
    {
      "type": "FACILITY-TYPE",
      "desc": "Facility Type"
    },
    {
      "type": "TYPE-SERVICE",
      "desc": "Type of Service"
    },
    {
      "type": "SPECIALITIES",
      "desc": "Specialities offered with System of medicine"
    },
    {
      "type": "SALUTATION",
      "desc": "Salutation of Nodal Contacts"
    },
    {
      "type": "FACILITY-REGION",
      "desc": "Facility Region for Demographic details"
    }
  ]
}
```

```

        "type": "SPECIALITY-TYPE",
        "desc": "Hospital Speciality Type"
    },
    {
        "type": "ADDRESS-PROOF",
        "desc": "Address Proof Types"
    },
    {
        "type": "FAC-STATUS",
        "desc": "Facility Operational Status"
    },
    {
        "type": "IT-EQUIPMENT",
        "desc": "IT Equipments available in the facility."
    },
    {
        "type": "GENERAL-INFO-OPTIONS",
        "desc": "Options available for questions related to Facility General Information."
    },
    {
        "type": "IMAGING",
        "desc": "Imaging Services offered by the facility"
    },
    {
        "type": "DIAGNOSTIC",
        "desc": "Diagnostic Lab services offered by the facility"
    },
    {
        "type": "DAYS-OF-OPERATION",
        "desc": "DAYS OF OPERATION offered by the facility"
    },
    {
        "type": "FACILITY-SUB-TYPE",
        "desc": "Facility Sub Type corresponding to Facility Type offered by Facility"
    },
    {
        "type": "SOURCE",
        "desc": "Source available for facility"
    }
}
]
}

```

2.2. Master Data

Using this API you can get the list of master data set for a particular Type of master.

Please note:

- This is a GET API and you need to send Type as a parameter.
- The response gives a list of all the values and their corresponding codes as the Master data
- All the HFR APIs will only accept the “code” with respect to any value for a field where master data is defined.

Parameters:

Params	Required	Description	Data type	Format if any
Type	Yes	Type of master data set	String	Accepted codes are types as specified in get-master-type API .

Specifications:

URL: <https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/get-master-data>

Request Method: GET

Headers:

Content-Type application/json

Authorization Bearer <access-token>

```
curl --location 'https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/get-master-data?type=OWNER' \
--header 'Authorization: ....'
```

Parameter	type=owner
Response	<pre>{ "type": "OWNER", "data": [{ "code": "G", "value": "Government" }, { "code": "P", "value": "Private" }, { "code": "PP", "value": "Public-Private-Partnership" }] }</pre>

2.3. LGD States

Using this API you can get the list of LGD codes for all states along with their districts as per <https://lgdirectory.gov.in/> that are used in HFR.

Please note:

- This is a basic GET API and no parameter is required
- The response gives a list of all the states and their LGD code.

- Each state has a sub list consisting of districts and their LGD codes
- All the HFR APIs will only accept the “code” with respect to any value for a demographic field where master data is defined.

Specifications:

URL: <https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/lgd/states>

Request Method: GET

Headers:

Content-Type application/json
Authorization Bearer <access-token>

Response:

```
{
  "code": "",
  "name": "",
  "districts": [
    {
      "code": "",
      "name": ""
    }
  ]
}
```

3.4. LGD Districts

Using this API you can get the list of LGD codes for all districts by passing the state code as per <https://lgdirectory.gov.in/> that are used in HFR.

URL:

<https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/lgd/districts?stateCode=34>

Request Method: GET

Headers:

Content-Type application/json
Authorization Bearer <access-token>

```
curl --location 'https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/lgd/districts?stateCode=34' \
--header 'Authorization: ....'
```

Response:

Parameter	stateCode=34
Response	<pre>[{ "code": "598", "name": "Karaikal" }, { "code": "599", "name": "Mahe" }, { "code": "600", "name": "Pondicherry" }, {</pre>

	<pre> "code": "601", "name": "Yanam" }] </pre>
--	---

3.5. LGD Sub Districts

Using this API you can get the list of LGD codes for all sub districts by passing the district code as per <https://lgdirectory.gov.in/> that are used in HFR.

URL: <https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/lgd/subdistricts?districtCode=4>

Request Method: GET

Headers:

Content-Type application/json

Authorization Bearer <access-token>

```

curl --location
'https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/lgd/subdistricts?districtCode=4' \
--header 'Authorization: ....'

```

Response:

Parameter	districtCode=4
Response	<pre> [{ "code": "6752", "name": "Assar" }, { "code": "65", "name": "Bhaderwah" }, { "code": "6747", "name": "Bhagwah" }, { "code": "6753", "name": "Bhalessa" }, { "code": "6755", "name": "Bhalla" }, { "code": "6746", "name": "Bharath Bagla" }, { "code": "7203", "name": "Bhella" }, { "code": "6754", "name": "Chilly Pingal" }, { "code": "6758", "name": "Chiralla" }, { </pre>

	<pre> "code": "62", "name": "Doda" }, { "code": "6749", "name": "Gundna" }, { "code": "6756", "name": "Kahara" }, { "code": "6748", "name": "Kashtigarh" }, { "code": "6751", "name": "Marmat" }, { "code": "6750", "name": "Mohalla" }, { "code": "6757", "name": "Phigsoo" }, { "code": "63", "name": "Thathri" }] </pre>

3.6. Facility Type

Using this API you can get the list of master data set for Facility Types which is dependent on Ownership and can be further filtered on the basis of System of Medicine.

Please note:

- You have to pass in all the required parameters to create the API.
- The data needs to be passed in the required format as mentioned for each field.

Parameters:

Params	Required	Description	Data type	Format if any
ownershipCode	Yes	Ownership of the facility	String	Accepted codes (G,P,PP) as specified in get-master-data API with type='OWNER'
systemOfMedicineCode	Yes	System of medicine followed by the facility	String	Accepted codes as specified in get-master-data API with type="MEDICINE" . In case you have multiple systems of medicine, send a comma separated string of codes.

Specifications:

URL:<https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/fetch-facility-type>

Request Method: POST

Headers:

Content-Type	application/json
Accept	application/json
Authorization	Bearer <access-token>

Request Body:

```
{
  "ownershipCode": "p",
  "systemOfMedicineCode": "M"
}
```

Response:

```
{
  "type": "FACILITY-TYPE",
  "data": [
    {
      "code": "10",
      "value": "Diagnostic Laboratory"
    },
    {
      "code": "9",
      "value": "Blood Bank"
    },
    {
      "code": "5",
      "value": "Hospital"
    },
    {
      "code": "1",
      "value": "Sub Centre"
    },
    {
      "code": "6",
      "value": "Medical College"
    },
    {
      "code": "37",
      "value": "Sanatorium"
    },
    {
      "code": "102",
      "value": "Health and Wellness Centre"
    },
    {
      "code": "12",
      "value": "Cath Laboratory"
    },
    {
      "code": "11",
      "value": "Pharmacy"
    },
    {
      "code": "4",
      "value": "Clinic/ Dispensary"
    },
    {
      "code": "74",
      "value": "Imaging Center"
    }
  ]
}
```

```
    },
    {
      "code": "2",
      "value": "Primary Health Centre"
    },
    {
      "code": "3",
      "value": "Community Health Centre"
    },
    {
      "code": "13",
      "value": "Dialysis Center"
    },
    {
      "code": "38",
      "value": "Other Facility"
    }
  ]
}
```

3.7. Get Owner Subtypes

Using this API you can get the list of master data set for Ownership Subtypes, and corresponding subtype of next level.

Please note:

- You have to pass in all the required parameters to create the API.
- The data needs to be passed in the required format as mentioned for each field.
- OwnershipCode is a mandatory field and ownerSubtypeCode is non mandatory. If you provide the ownership code , you will get a list of ownership subtypes being used under that particular ownership. You can use this subtype code and get the next set of subtypes under this criteria.

Parameters:

Params	Required	Description	Data type	Format if any
ownershipCode	Yes	Ownership Code as available in HFR	String	Accepted codes as specified in get-master-data API with type='OWNER'
ownerSubtypeCode	Yes	Ownership subtype code, as available in HFR, under any Ownership	String	Accepted codes as specified in get-owner-subtype API with OwnershipCode as G/P/PP

Specifications:

URL: <https://apihpsbx.abdm.gov.in/v4/int/v1.5/facility/get-owner-subtype>

Request Method: POST

Headers:

Content-Type application/json
Accept application/json
Authorization Bearer <access-token>

Sample 1

Request Body:

```
{  
  "ownershipCode": "G",  
  "ownerSubtypeCode": "P"  
}
```

Response:

```
{  
  "code": "HIS-1108",  
  "message": "Invalid Owner Subtype Code. Only 'C' is accepted for Ownership Code 'G'."  
}
```

Sample :2

Request body :

```
{
  "ownershipCode": "G",
  "ownerSubtypeCode": "C"
}
```

Response:

```
{
  "type": "CENTRAL-GOVERNMENT",
  "data": [
    {
      "code": "MOHF",
      "value": "Mo Health and Family Welfare"
    },
    {
      "code": "MOR",
      "value": "Mo Railways"
    },
    {
      "code": "MOP",
      "value": "Mo Power"
    },
    {
      "code": "MOC",
      "value": "Mo Coal"
    },
    {
      "code": "MOLE",
      "value": "Mo Labour & Employment (includes ESIC)"
    },
    {
      "code": "MOHI",
      "value": "Mo Heavy Industries and Public Enterprises"
    },
    {
      "code": "MOSSteel",
      "value": "Mo Steel"
    },
    {
      "code": "MOS",
      "value": "Mo Shipping"
    },
    {
      "code": "MOD",
      "value": "Mo Defense"
    },
    {
      "code": "MOM",
      "value": "Mo Mines"
    },
    {
      "code": "MOPN",
      "value": "Mo Petroleum and Natural Gas"
    },
    {
      "code": "MOA",
      "value": "Mo AYUSH"
    },
    {
      "code": "MOST",
      "value": "Mo Science and Technology"
    },
    {
      "code": "MOJ",
      "value": "Mo JalShakti"
    },
  ],
}
```

```

{
  "code": "Other",
  "value": "Any Other (Please specify)"
},
{
  "code": "MOAE",
  "value": "Department of Atomic Energy"
},
{
  "code": "MOHA",
  "value": "Ministry of Home Affairs"
},
{
  "code": "MOND",
  "value": "New Delhi Municipal Council (NDMC)"
},
{
  "code": "DOPT",
  "value": "Department of Personnel & Training"
}
]
}

```

Sample :3

Request body:

```

{
  "ownershipCode": "P",
  "ownerSubtypeCode": "P"
}

```

Response:

```

{
  "type": "PROFIT-TYPE",
  "data": [
    {
      "code": "PP03",
      "value": "Limited Liability Partnership"
    },
    {
      "code": "PP01",
      "value": "Sole Proprietorship"
    },
    {
      "code": "PP04",
      "value": "Partnership"
    },
    {
      "code": "PP02",
      "value": "Registered companies (registered under relevant central/state Act)"
    }
  ]
}

```

sample: 4

Request body:

```

{
  "ownershipCode": "P",
  "ownerSubtypeCode": "C"
}

```

Response:

```
{
  "type": "PROFIT-TYPE",
  "data": [
    {
      "code": "PP03",
      "value": "Limited Liability Partnership"
    },
    {
      "code": "PP01",
      "value": "Sole Proprietorship"
    },
    {
      "code": "PP04",
      "value": "Partnership"
    },
    {
      "code": "PP02",
      "value": "Registered companies (registered under relevant central/state Act)"
    }
  ]
}
```

3.8. Get Specialities

Using this API you can get the list of master data set for Specialities / Specializations / Services offered under HFR , with respect to any System of Medicine available.

Please note:

- You have to pass in all the required parameters to create the API.
- The data needs to be passed in the required format as mentioned for each field.
- You can pass only a single System of Medicine code in the request.

Parameters:

Params	Required	Description	Data type	Format if any
systemOfMedicineCode	Yes	System of MedicineCode, as available in HFR, for which you want to know the specializations offered.	String	Accepted codes as specified in get-master-data API with type="MEDICINE" .

Specifications:

URL: <https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/get-specialities>

Request Method: POST

Headers:

Content-Type	application/json
Accept	application/json
Authorization	Bearer <access-token>

Sample 1 Request Body:

```
{
  "systemOfMedicineCode": "M"
}
```

Response:

```
{
  "type": "SPECIALITIES",
  "data": [
```

```

{
  "code": "M-S1",
  "value": "GeneralMedicine"
},
{
  "code": "M-S35",
  "value": "FamilyMedicine"
},
{
  "code": "M-S36",
  "value": "Emergency Medicine"
},
{
  "code": "M-S20",
  "value": "Obstetricsand Gynecology"
},
{
  "code": "M-S2",
  "value": "Pediatrics"
},
{
  "code": "M-S19",
  "value": "GeneralSurgery"
},
{
  "code": "M-S21",
  "value": "Orthopaedics"
},
{
  "code": "M-S23",
  "value": "ENT"
},
{
  "code": "M-S16",
  "value": "Anaesthesia"
},
{
  "code": "M-S24",
  "value": "Ophthalmology"
},
{
  "code": "M-S25",
  "value": "Urology"
},
{
  "code": "M-S18",
  "value": "CriticalCare"
},
{
  "code": "M-S37",
  "value": "Radiology"
},
{
  "code": "M-S4",
  "value": "Pulmonology(Chestdiseases and respiratory medicine)"
},
{
  "code": "M-S8",
  "value": "Gastroenterology"
},
{
  "code": "M-S5",
  "value": "Dermatologyand Venerology (Skin & VD) RTI/STI"
},
{
  "code": "M-S3",

```

```

        "value": "Neonatology"
    },
    {
        "code": "M-S10",
        "value": "Dialysis"
    },
    {
        "code": "M-S6",
        "value": "Cardiology"
    },
    {
        "code": "M-S11",
        "value": "Psychiatry"
    },
    {
        "code": "M-S12",
        "value": "Geriatrics"
    },
    {
        "code": "M-S15",
        "value": "Neurology"
    },
    {
        "code": "M-S41",
        "value": "Polytrauma"
    },
    {
        "code": "M-S9",
        "value": "Nephrology"
    },
    {

},
{
  "code": "M-S30",
  "value": "Aviationmedicine"
}
]
}

```

3.9. Facility Subtype

Using this API you can get the list of master data set for Facility Sub Types which is dependent on Facility Type Code.

Please note:

- You have to pass in all the required parameters to create the API.
- The data needs to be passed in the required format as mentioned for each field.

Parameters:

Params	Required	Description	Data type	Format if any
facilityTypeCode	Yes	Facility code	String	Accepted codes as specified in fetch-facility-type

Specifications:

URL: <https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/fetch-facility-Sub-type>

Request Method: POST

Headers:

Content-Type	application/json
Accept	application/json
Authorization	Bearer <access-token>

Request Body:

```
{
  "facilityTypeCode": "5"
}
```

Response:

```
{
  "type": "FACILITY-SUB-TYPE",
  "data": [
    {
      "code": "29",
      "value": "Any Other"
    },
    {
      "code": "44",
      "value": "Area Hospital"
    },
    {
      "code": "2",
      "value": "Central Hospital"
    },
    {
      "code": "47",
      "value": "Civil Hospital"
    },
    {
      "code": "32",
      "value": "Daycare Center"
    },
    {
      "code": "6",
      "value": "District Hospital"
    },
    {
      "code": "7",
      "value": "Divisional Hospital"
    },
    {
      "code": "28",
      "value": "General Hospital"
    },
    {
      "code": "33",
      "value": "Infertility Center"
    },
    {
      "code": "48",
      "value": "Leprosy Hospital"
    },
    {
      "code": "36",
      "value": "Maternity Home"
    },
    {
      "code": "12",
      "value": "Municipal Corporation Hospital"
    },
    {
      "code": "30",
      "value": "No Applicable Subtype"
    },
    {
      "code": "13",
      "value": "Nursing Home"
    },
  ],
}
```

```

{
  "code": "34",
  "value": "Palliative Care"
},
{
  "code": "14",
  "value": "Police Hospital"
},
{
  "code": "16",
  "value": "Referral Hospital"
},
{
  "code": "17",
  "value": "Regional Hospital"
},
{
  "code": "35",
  "value": "Rehabilitation Center"
},
{
  "code": "18",
  "value": "Sanatorium"
},
{
  "code": "19",
  "value": "Sub-District Hospital"
},
{
  "code": "20",
  "value": "Sub-Divisional Hospital"
},
{
  "code": "22",
  "value": "Taluka Hospital"
},
{
  "code": "21",
  "value": "Taluk Head Quarters Hospital"
},
{
  "code": "31",
  "value": "T.B. Hospital"
},
{
  "code": "24",
  "value": "Woman's Hospital"
},
{
  "code": "25",
  "value": "Workshop Hospital"
},
{
  "code": "43",
  "value": "Zonal Hospital"
}
]
}

```

4. Multiple HRP API

This API will be used to link multiple bridges against a facility. It will accept the facility id ,facility name and list of HRP i.e. bridges.

Please note:

- You have to pass in all the required parameters to create the API.
- The data needs to be passed in the required format as mentioned for each field.

Parameters:

Params	Required	Description	Data type	Format if any
facilityId	Yes	Will be validated if present in HFR or not	String	Starting with IN and of 12characters
facilityName	Yes	Name of the facility to be linked	String	Alphanumeric
bridgeId	Yes	Valid Bridge Id to be linked.	String	Alphanumeric and validity to be checked by HIECM
hipName	Yes	To provide uniqueness against each bridges that is linked . HIP name is the name of the hospital which will reflect on ABHA/PHR app when the patent will search for the respective hospital.	String	HIP name can be th Hospital name added withsuffix of bridge name. Example: Hospital name=XYZ and bridge name =BRIDGE TEST, so the HIP name = XYZ BRIDGE. • HIP name can not be mor than 15 characters., No specialcharacter is allowed(%\$*#@(~&!), and it shouldbe unique for every bridge for a facility
Type	Yes	HIP/HIU etc	String	Validated BY HIECM
Active	Yes	True/False	boolean	Accept boolean value

Specifications:

URL: <https://apihspbx.abdm.gov.in/v4/int/v1/bridges/MutipleHRPAddUpdateServices>

Request Method: POST

Headers:

Content-Type	application/json
Accept	application/json
Authorization	Bearer <access-token>

Sample 1: When no bridge id is linked with facility.

Request body:

```
{
  "facilityId": "IN2810002708",
  "facilityName": "Test Hospital 104",
  "HRP": [
    {
      "bridgeId": "SBX_000135",
      "hipName": "Test Hospital 104",
      "type": "HIP",
      "active": true
    }
  ]
}
```

Response:

Http Status : 200 Ok

```
[
  {
    "servicesLinked": {
      "id": "SBX_000135",
      "name": "Testing",
      "types": [
        "HIP"
      ],
      "active": true
    }
  }
]
```

Sample 2: When all bridge id is already linked

Request body:

```
{
  "facilityId": "IN2810002708",
  "facilityName": "Test Hospital 104",
  "HRP": [
    {
      "bridgeId": "SBX_000135",
      "hipName": "Test Hospital 104",
      "type": "HIP",
      "active": true
    }
  ]
}
```

Response:

Http Status : 200 Ok

```
[
  {
    "error": {
```

```

        "code": "2500",
        "message": "Bridge Id SBX_000135  is already associated with service id:IN2810002708"
    }
}
]

```

Sample 3: When some bridge ids is already linked in request body

Request body:

```

{
  "facilityId": "IN2710020480",
  "facilityName": "DR Agarwal Pathology lab",
  "HRP": [
    {
      "hipName": "DR Agarwal Pathology lab DEEPAK_LTI",
      "active": "true",
      "bridgeId": "MANISH_TEST",
      "type": "HIP"
    },
    {
      "hipName": "DR Agarwal Pathology lab WEBEMR011000005",
      "active": "true",
      "bridgeId": "WEBEMR011000005",
      "type": "HIP"
    },
    {
      "hipName": "DR Agarwal Pathology lab CDAC",
      "active": "true",
      "bridgeId": "CDAC",
      "type": "HIP"
    }
  ]
}

```

Response:

Http Status: 200 Ok

```
[
  {
    "servicesLinked": {
      "id": "IN2410009502_3",
      "name": "SC Nana Kandhasar",
      "types": [
        "HIP"
      ],
      "active": true
    }
  },
  {
    "error": {
      "code": "2506",
      "message": "Bridge id: CDAC is already associated with service id: IN2410009502"
    }
  },
  {
    "error": {
      "code": "2506",
      "message": "Bridge id: MANISH_TEST is already associated with service id: IN2410009502"
    }
  }
]
```

Sample 4: When HIP Name is already linked or Empty or contains Special CharactersRequest body :

```
{
  "facilityId": "IN2410009502",
  "facilityName": "SC Nana Kandhasar",
  "HRP": [
    {
      "hipName": "",
      "active": "true",
      "bridgeId": "WEBEMR011000005",
      "type": "HIP"
    },
    {
      "hipName": "SC Nana Kandhasar Web2",
      "active": "true",
      "bridgeId": "CDAC",
      "type": "HIP"
    }
  ]
}
```

```

        "hipName": "@$!#@#!",
        "active": "true",
        "bridgeId": "MANISH_TEST",
        "type": "HIP"
    }
]
}

```

Response:

Http Status: 200 ok

```

[
  {
    "error": {
      "code": "2500",
      "message": "HIP Name is mandatory"
    }
  },
  {
    "error": {
      "code": "2500",
      "message": "HIP Name is already associated with service id:IN2410009502"
    }
  },
  {
    "error": {
      "code": "2500",
      "message": "HIP Name should not have special characters"
    }
  }
]

```

5. Send OTP To Contact

This API is designed to send a One-Time Password (OTP) to the registered mobile number associated with a facility. It requires the facility ID as input and generates an OTP and transaction id to validate.

Please note:

- You must pass in all the required parameters to create the API.
- The data needs to be passed in the required format as mentioned for each field.

Parameters:

Params	Required	Description	Data type	Format if any
facilityId	Yes	Will be validated if present in HFR or not	String	Starting with IN and of 12 characters

Specifications :

URL: <https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/sendOtpToContact>

Request Method: POST

Headers:

Content-Type application/json

Authorization Bearer <access-token>

Sample 1: When facility id is linked with mobile number Request body:

```
{
  "facilityId": "IN2810002718"
}
```

Response:

Http Status: 200 Ok

```
[
  {
    "facilityId": "IN2810002718",
    "status": "Success",
    "message": "Otp sent successfully! Please keep transaction id for future reference",
    "transactionId": "efcd063c-7c4a-421f-8c2d-62de95ca82d6",
    "errorStatus": null
  }
]
```

```
curl --location 'https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/sendOtpToContact'
--header 'Content-Type: application/json'
--header 'Accept: /'
--header 'Authorization: Bearer
eyJhbGciOiJSUzI1NiIsInR5cCI6IkpXZWQ6Iiwia2lkIiA6ICJBbFJiNVdDbThUbTlFS19JZk85ejA2ajlvQ3Y1MXBLS0ZrbkdX
hzeCq2x3mQphWVpdsHcNVdB22wwc26FdxSBmvKRJGVDCSTASZjHGu-C6mbrR0iAOYfAurIb7ThiJx43jn9Z_8sHkzZW-
x_BIXMjl3rDCr6yoSysonlxY9v0Z34AC2u92nbQaxflcDrXfL0z1Y12pZf95O--Iu9E-V7tCqmmWj5m8wP2RG4b7nqIlpO-
xFrVDTrIBPjImBDG6LRDem8OX2DKgQ6vv43C-nEaaeRLDtYzQ4yirqV_eBVmebSxOF2o_4lrsQXDWU0fA'
--data '{ "facilityId": "IN2810002714"
}'
```

Sample 2: When facility id starts with other character instead of IN:

```
{
  "facilityId": "IP2810002718"
}
```

Response:

Http Status: 400 Bad Request

```
[
  {
    "facilityId": null,
    "status": "Bad Request",
    "message": "Errors occurred",
    "transactionId": null,
    "errorStatus": [
      {
        "field": "facilityId",
        "message": "The Facility ID provided is invalid. It must begin with
the prefix IN to meet the required format."
      }
    ]
  }
]
```

1

Sample 3: When facility id has less than 12 characters:

```
{
  "facilityId": "IP28100027"
}
```

Response:

Http Status: 400 bad request.

```
[
  {
    "facilityId": null,
    "status": "Bad Request",
    "message": "Errors occurred",
    "transactionId": null,
    "errorStatus": [
      {
        "field": "facilityId",
        "message": "Facility id is invalid. It must have 12 characters IP28100027"
      }
    ]
  }
]
```

1

6. Validate OTP

This API is designed to validate a One-Time Password (OTP) sent to the registered mobile number associated with a facility. It requires the **facilityId**, **sourceId**, **otp**, **source**, **transactionId**.

Please note:

- You must pass in all the required parameters to create the API.
- The data needs to be passed in the required format as mentioned for each field.

Parameters:

Params	Required	Description	Data type	Format if any
facilityId	Yes	Will be validated if present in HFR or not	String	Starting with IN and of 12 characters
sourceId	Yes	Will be validated if present in HFR or not	String	UWIN, PMNDP, AB-PMJAY, NHRR, HMIS-CDAC, NIN, eHospital, STHMISID, STINSID, COWIN
otp	Yes	Will be validated if present in HFR or not	String	6-digit number received from the API response
source	Yes	Will be validated if present in HFR or not	String	UWIN, PMNDP, AB-PMJAY, NHRR, HMIS-CDAC, NIN, eHospital, STHMISID, STINSID, COWIN
transactionId	Yes	Will be validated if present in HFR or not	String	Use the transaction Id received after getting response from the API https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/sendOtpToContact

Specifications:

URL: <https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/validateOtp>

Request Method: POST

Headers:

Content-Type application/json

Authorization Bearer <access-token>

Sample 1: When all fields are present:

```
{
  "facilityId": "IN2810002714",
  "sourceId": "COWIN",
  "otp": "091729",
  "source": "COWIN",
  "transactionId": "c22f9549-6d0f-436a-bc62-de05d57e7083"
}
```

Response:

Http Status: 200 OK.

```
[
  {
    "facilityId": "IN2810002714",
    "status": "success",
    "message": "OTP validated successfully!!! Hospital id linked to HFR",
    "errorStatus": null
  }
]
```

```
curl --location 'https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/validateOtp'
--header 'Content-Type: application/json'
--header 'Accept: /'
--header 'Authorization;'
--data '{ "facilityId": "IN2810002714", "sourceId": "COWIN", "otp": "091729", "source": "COWIN",
"transactionId": "c22f9549-6d0f-436a-bc62-de05d57e7083" } '
```

Sample 2: When source field is missing:

```
{
  "facilityId": "IN2810002714",
  "sourceId": "COWIN",
  "otp": "091729",
  "source": "",
  "transactionId": "c22f9549-6d0f-436a-bc62-de05d57e7083"
}
```

Response:

Http Status: 422 Un processable Entity.

```
[
  {
    "code": "HIS-422",
    "message": "Unable to process the current request due to some wrong data entered.",
    "details": [
      {
        "message": "Invalid/Blank facility source, please enter a valid facility
source.",
        "code": "HIS-4057",
        "attribute": null
      }
    ]
  }
]
```

7. Fetch Facility Contact Details

This API is developed to search for a facility based on the facility id. It provides all the contacts details and information regarding the requested facility for the user.

Please note:

- You must pass on all the required parameters to create the API.
- The data needs to be passed in the required format as mentioned for each field.

Parameters:

Params	Required	Description	Data type	Format if any
facilityId	Yes	Will be validated if present in HFR or not	String	Starting with IN and of 12 characters

Specifications:

URL: <https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/fetchFacilityContactDetails>

Request Method: POST

Headers:

Content-Type application/json

Authorization Bearer <access-token>

Sample 1: When we pass the correct facility ID.

```
curl --location
'https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/fetchFacilityContactDetails' \
--header 'Content-Type: application/json' \
--header 'Accept: */*' \
--header 'Authorization: Bearer <bearer_token>' \
--header 'Content-Type: text/plain' \
--data '{
  "facilityId": "IN2710002921"
}'

{
  "facilityId": "IN2710002921"
```

```
}
```

Response:

Http Status: 200 OK.

```
{
  "facility": {
    "facilityId": "IN2710002921",
    "facilityName": "Ashram",
    "contactName": "Akshay Goraksh Shelke",
    "contactMobile": "*****8538",
    "contactEmail": "she*****@gmail.com",
    "hprid": "71-2325-3152-8712"
  },
  "status": "Success",
  "message": "Details found successfully",
  "errorStatus": null
}
```

Sample 2: When we pass the incorrect facility ID.

```
curl --location
'https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/fetchFacilityContactDetails' \
--header 'Content-Type: application/json' \
--header 'Accept: */*' \
--header 'Authorization: Bearer <bearer_token>' \
--header 'Content-Type: text/plain' \
--data '{
  "facilityId": "IN27100029"
}'
```

Response:

Http Status: 404 Not Found.

```
{
  "facility": null,
  "status": "No Content",
  "message": "No active facility found! Please check your facility Id",
  "errorStatus": [
    {
      "field": "facilityId",
      "message": "Facility id is invalid: IN27100029"
    }
  ]
}
```

8. Fetch Facility Details for UWIN

This API is developed to search for a facility based on the facility id, Source and Source ID. It provides all the facility details and other information regarding the requested facility for the user.

Please note:

- You must pass on all the required parameters to create the API.
- The data needs to be passed in the required format as mentioned for each field.

Parameters:

Params	Required	Description	Data type	Format if any
facilityId	Yes	Will be validated if present in HFR or not	String	Starting with IN and of 12 characters
Source	Yes	Will be validated if present in HFR or not	String	UWIN, PMNDP, AB-PMJAY, NHRR, HMIS-CDAC, NIN, eHospital, STHMISID, STINSID, COWIN
sourceId	Yes	Will be validated if present in HFR or not	String	UWIN, PMNDP, AB-PMJAY, NHRR, HMIS-CDAC, NIN, eHospital, STHMISID, STINSID, COWIN

Specifications:

URL: <https://apihspbx.abdm.gov.in/v4/int/v1.6/facility/fetchDetailsForUwin>

Request Method: POST

Headers:

Content-Type application/json

Authorization Bearer <access-token>

Sample 1: When we pass the correct facility ID.

```
curl --location 'https://apihspbx.abdm.gov.in/v4/int/v1.6/facility/fetchDetailsForUwin' \
--header 'Content-Type: application/json' \
--header 'Authorization: Bearer <bearer_token>' \
--data '{
  "facilityId": "IN2410001111",
  "source": "UWIN",
  "sourceId": "UWIN"
}'
```

Response:

Http Status: 200 OK.

```
{
  "facility": {
    "facilityId": "IN2410001111",
    "facilityName": "Sahyadri Hospital",
    "contactName": "Amol Tulshiram Hudekar",
    "contactMobile": "*****2021",
    "contactEmail": "amo*****@ltimindtree.com",
    "hprid": "71-3115-2671-2216"
  },
  "otherInformation": {
    "facilityOwnership": "G",
    "ownerSubtype": "C",
    "facilityRegion": "U",
    "nin": "1234",
    "addressLine1": "Tathawade",
  }
}
```

```

        "addressLine2": "Pune",
        "stateCode": "24",
        "districtCode": "438",
        "subDistrict": "6512",
        "pincode": "382350",
        "latitude": "23.068570",
        "longitude": " 23.068570",
        "facilityType": "Hospital"
    },
    "status": "Success",
    "message": "Details found successfully",
    "errorStatus": null
}

```

Sample 2: When we pass the incorrect facility ID.

```

curl --location 'https://apihspbx.abdm.gov.in/v4/int/v1.6/facility/fetchDetailsForUwin' \
--header 'Content-Type: application/json' \
--header 'Authorization: Bearer <bearer_token>' \
--data '{
    "facilityId": "IN241000111",
    "source": "UWIN",
    "sourceId": "UWIN"
}'

```

Response:

Http Status: 400 Bad Request.

```

{
    "facility": null,
    "otherInformation": null,
    "status": "Not Linked",
    "message": "Source id not linked. Please check the errors",
    "errorStatus": [
        {
            "field": "facilityId",
            "message": "Facility id is invalid"
        }
    ]
}

```

9. Validate OTP for UWIN

This API is developed to validate OTP for a facility based on the OTP, transaction id, facility id, Source and Source ID. It provides all the facility id and other information (address details) regarding the requested facility for the user.

For to **send OTP** use **send otp to contact** api as given above. (

<https://apihspbx.abdm.gov.in/v4/int/v1.5/facility/sendOtpToContact>)

Please note:

- You must pass on all the required parameters to create the API.
- The data needs to be passed in the required format as mentioned for each field.

Parameters:

Params	Required	Description	Data type	Format if any
facilityId	Yes	Will be validated if	String	Starting with IN and of

		present in HFR or not		12 characters
Source	Yes	Will be validated if present in HFR or not	String	UWIN, PMNDP, AB-PMJAY, NHRR, HMIS-CDAC, NIN, eHospital, STHMISID, STINSID, COWIN
sourceId	Yes	Will be validated if present in HFR or not	String	UWIN, PMNDP, AB-PMJAY, NHRR, HMIS-CDAC, NIN, eHospital, STHMISID, STINSID, COWIN
Otp	Yes	OTP Will be validated if present in HFR or not	String	6-digit number received from the API response
transactionId	Yes	Will be validated if present in HFR or not	String	Use the transaction Id received after getting response from the API https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/sendOtpToContact

Specifications :

URL: <https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/validateUwinOtp>

Request Method: POST

Headers:

Content-Type application/json

Authorization Bearer <access-token>

Sample 1: When we pass the correct facility ID.

```
curl --location 'https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/validateUwinOtp' \
--header 'Content-Type: application/json' \
--header 'Authorization: Bearer <bearer_token>' \
--data '{
  "facilityId": "IN2410001111",
  "sourceId": "UWIN",
  "otp": "150779",
  "source": "UWIN",
  "transactionId": "66de14f5-bf59-4144-bf55-abaea14cef23"
}'
```

Response:

Http Status: 200 OK.

```
{
  "facilityId": "IN2410001111",
  "status": "success",
  "message": "OTP validated successfully!!! Source id linked to HFR",
  "otherInformation": {
    "facilityOwnership": "G",
    "ownerSubtype": "C",
    "facilityRegion": "U",
    "nin": "1234",
    "addressLine1": "Tathawade",
    "addressLine2": "Pune",
    "stateCode": "24",
    "districtCode": "438",
    "subDistrict": "6512",
    "pincode": "382350",
    "latitude": "23.068570",
    "longitude": "73.068570",
    "facilityType": "Hospital"
  }
}
```

```

    },
    "errorStatus": null
}

```

Sample 2: When we pass the incorrect OTP.

```

curl --location 'https://apihspsbx.abdm.gov.in/v4/int/v1.5/facility/validateUwinOtp' \
--header 'Content-Type: application/json' \
--header 'Authorization: Bearer <bearer_token>' \
--data '{
    "facilityId": "IN2410001111",
    "sourceId": "UWIN",
    "otp": "150679",
    "source": "UWIN",
    "transactionId": "66de14f5-bf59-4144-bf55-abaea14cef23"
}'

```

Response:

Http Status: 400 Bad Request.

```

{
    "facilityId": "IN2410001111",
    "status": "failed",
    "message": "Please enter valid OTP",
    "otherInformation": null,
    "errorStatus": null
}

```

10.Deduplicate Api for Search Facility

This API is developed to search for duplicate facility based on the name, address, district code, sub district code, village, geolocation and facility ID (fac unique id). It provides the facilities details as present.

Please note:

- You must pass name, district, and subdistrict parameter in the API to get the possible duplicates.
- The data needs to be passed in the required format as mentioned for each field.

Parameters:

Params	Required	Data type	Format if any
facilityId	No	String	6-digit number received from the API response (fac unique id)
name	Yes	String	Name of the facility which alphanumeric
address	No	String	Alphanumeric string accepted along with few special characters (.-,/()_) and min length is 5.
district	Yes	String	LGD Code
Sub district	Yes	String	LGD Code
village	No	String	LGD Code
geolocation	No	String	Latitude & Longitude combination with format as 23.999999,48.777777 Latitude - Real Number ranging from -90.000000 to +90.000000 with 1-6 decimal places Longitude - Real Number ranging from -180.000000 to +180.000000 with 1-6 decimal places

Specifications:

URL: `https://apihspsbx.abdm.gov.in/v4/int/search/address/filter/deduplicate`

Request Method: POST

Headers:

Content-Type application/json

Authorization Bearer <access-token>

Sample 1: When we pass the correct details.

```
curl --location 'https://apihspsbx.abdm.gov.in/v4/int/search/address/filter/deduplicate' \
--header 'Content-Type: application/json' \
--header 'Authorization: Bearer <bearer_token>' \
--data '{
    "name": "tshjh123",
    "address": "alampur",
    "district": "499",
    "subDistrict": "3997",
    "village": "530905",
    "geolocation": "20.615650141340424,77.5024892539671",
    "facilityId": ""
}'
```

Response:

Http Status: 200 OK.

```
[
  {
    "facility_name": "tsst1",
    "alternate_id": "IN*****93",
    "sub_district": "Karanja",
    "district": "Washim",
    "state": "Maharashtra",
    "distances": "0"
  },
  {
    "facility_name": "tst",
    "alternate_id": "IN*****92",
    "sub_district": "Karanja",
    "district": "Washim",
    "state": "Maharashtra",
    "distances": "111"
  }
]
```

Sample 2: When we pass the incorrect Facility Id.

```
curl --location 'https://apihspsbx.abdm.gov.in/v4/int/search/address/filter/deduplicate' \
--header 'Content-Type: application/json' \
--header 'Authorization: Bearer <bearer_token>' \
--data '{
    "name": "tshjh123",
    "address": "alampur",
    "district": "499",
    "subDistrict": "3997",
    "village": "530905",
    "geolocation": "20.615650141340424,77.5024892539671",
    "facilityId": ""
}'
```

```
    "facilityId": "abc1234"  
  }'
```

Response:

Http Status: 400 Bad Request.

```
{  
  "code": "HIS-422",  
  "message": "Unable to process the current request due to some wrong data entered.",  
  "details": [  
    {  
      "message": "Please enter valid facility Id.",  
      "code": "HIS-1113",  
      "attribute": null  
    }  
  ]  
}
```
