

AYUSHMAN BHARAT DIGITAL MISSION

Registration in Healthcare Professional Registry (HPR) via APIs

Document Version- 2.0
Created On- 22-06-2026

Terminology:

ABDM - Ayushman Bharat Digital Mission

Authorization token - To obtain, the HRP can call 'sessions API' along with the received ClientID and Client Secret. Same must be used in header for other APIs.

Client ID - Post internal approval, Integrator will receive Client ID to access ABDM APIs

Client Secret - Post internal approval, Integrator will receive Client Secret to access ABDM APIs

HPRID – Healthcare Professional ID

Sandbox - Sandbox is a framework that will allow technologies or products to be tested in the contained environment in compliance with ABDM standards.

Register Health Professional (Doctor & Nurse)

Below document explains how to register with pre verified details to HPRID and HPR systems.

INDEX – List of APIs for Health Professional Registration

S. No.	API / Topic	Page No.
—	HPRID Gateway Token	4
1	Generate Aadhaar Link	5
1.1	Check Aadhaar Authentication Status	6
1.2	Verify OTP and Fetch User Details	7
1.3	API to Check HPID Exist by Aadhaar	8
2	HPRID API for Verifying Mobile Number Same as Aadhaar Mobile (Via Demo Auth)	10
2.1	HPRID Generate Mobile OTP (Via OTP, if Demo Auth Failed)	11
2.2	HPRID Verify Mobile OTP	12
3	Get Suggested Username from HPRID	13
4	Create HPRID	13
5	Search Facility API	19
6	Register Professional	22
7	Retrieve Professional Document List API	38
8	Upload Documents API	43

HPRID Gateway Token

Authentication Token need to be generated using client ID and client Secret. To obtain clientId and clientSecret, please register on Sandbox Application.

Headers

REQUEST-ID :

Unique UUID for tracking the end-to-end unique transaction.

Code example :

Java-<https://www.uuidgenerator.net/dev-corner/java>

TIMESTAMP:

The actual time when the request was initiated, ISO 8601 represents the date and time by starting with the year, followed by the month, the day, the hour, the minutes, seconds, and milliseconds

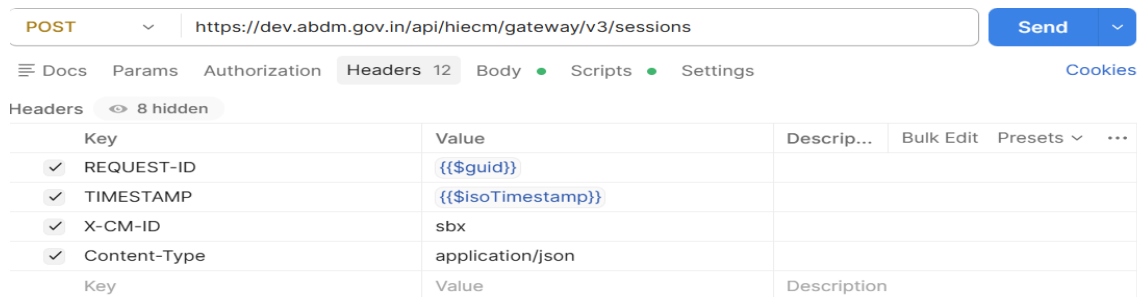

X-CM-ID :

This value depends on the environment where API is getting executed.

Eg. SBX or PROD.

For SBX- sbx and for PROD- abdm

For Running in postman,Please pass like this .

Request type	POST
URL	https://dev.abdm.gov.in/api/hiectm/gateway/v3/sessions
Request Body/Payload	<pre>{ "clientId": "xxxxxxx", "clientSecret": "5bbbx-3xxx-4xx-a6xx-5bc552319xxx", "grantType": "client_credentials" }</pre>

Response: Access Token will be sent in api response.

```

  "tokenType": "bearer"
}
```

This API generates a unique transaction ID (txnId) and a temporary URL for the user. The user is required to visit this URL, provide their Aadhaar details, verify their identity (such as through an OTP), and complete the authentication process. The response includes the txnId, which is necessary for subsequent APIs, and the URL to redirect the user to. This step marks the entry point for Aadhaar verification.

Key: Authorization
Value: Bearer<Leave Space><Your Access Token goes here>

5

Request Body/Payload	<pre>{ "scopes": ["nhpr-register"], "source": "NHPR" }</pre>
-----------------------------	--

Response: Transaction ID will be generated.

Sample Response

```
{
  "status": "URL GENERATED",
  "txnId": "563109c8-4220-42be-82ed-081ea64468e7",
  "url": "https://healthidbeta.abdm.gov.in/abdm/aadhaar/gateway/auth?link_id=xxxx"
}
```

NOTE: THIS URL WILL BE VALID ONLY FOR 5 MINS AFTER EXPIRATION PLEASE HIT THE API AGAIN.

1.1 Check Aadhaar Authentication Status

This polling API is optional and is used to check if the user has successfully verified their Aadhaar details for a given transaction ID obtained from API 1. The API returns a Boolean value indicating whether the verification is complete. It is recommended to use this API in a loop with suitable delays after redirecting the user, until the response is true or a timeout occurs.

Note: Append tokenType Bearer before the access token, give a space and then add your access token as shown below.

Key: Authorization

Value: Bearer<Leave Space><Your Access Token goes here

Request type	POST
URL	https://apihspsbx.abdm.gov.in/v4/int/aadhaar/isAuthenticated
Request Body/Payload	<pre>{ "txnId": "563109c8-4220-42be-82ed-081ea64468e7" }</pre>

Response: Previously generated Transaction ID will be returned in this response.

- Boolean value: true if the user has verified their Aadhaar details for the transaction; false otherwise.

Notes: The response is a simple boolean (not wrapped in an object).

Sample Response

true

1.2 Verify OTP and Fetch User Details

This API completes the Aadhaar verification process by validating the OTP (handled implicitly via the transaction flow) and retrieving the user's complete demographic and address details from Aadhaar records. It uses the transaction ID from API 1, and should be invoked only after authentication confirmation via API 2 or directly if polling is not performed. The response includes masked sensitive data such as a partial mobile number and detailed address components.

Request type	POST
URL	https://apihspsbx.abdm.gov.in/v4/int/v2/registration/aadhaar/verifyOTP
Request Body/Payload	{ "txnId": "563109c8-4220-42be-82ed-081ea64468e7" }

Response

```
{
  "txnId": "563109c8-4220-42be-82ed-081ea64468e7",
  "mobileNumber": "*****5126",
  "photo": "base64_encoded_image",
  "name": "Rahul Sharma",
  "gender": "M",
  "dob": "1990-01-01",
  "address": {
    "house": "12A",
    "street": "MG Road",
    "district": "Bangalore",
    "state": "Karnataka",
    "pincode": "560001"
  }
}
```

```
}  
}
```

1.3. API to Check HPID Exist by Aadhaar

This API will provide you with HPID registered in Portal after the verification of Aadhaar OTP. Add the accessToken received from the **HPRID Gateway Token API** for authorization.

Note: Append tokenType Bearer before the access token, give a space and then add your access token as shown below .

Key: Authorization

Value: Bearer<Leave Space><Your Access Token goes here>

1. Check HPID Exist or Not

Method	Post
URL	https://apihspsbx.abdm.gov.in/v4/int/v1/registration/aadhaar/checkHpIdAccountExist
Request Body	{ "txnId": "38022xxxx-745c-43xx-91ff-4471a25e9xxx" }

Sample Response

```
{
  "token": "",
  "hprIdNumber": "",
  "categoryId": 0,
  "subCategoryId": 0,
  "txnId": "18e863dc-ba08-4889-b9a2-b22975e9499e",
  "name": "Full Name",
  "gender": "M",
  "yearOfBirth": "1994",
  "monthOfBirth": "8",
  "dayOfBirth": "12",
  "firstName": "FirstName",
  "middleName": "Kumar",
  "lastName": "Singh",
  "stateCode": "27",
  "districtCode": "490",
  "stateName": "Maharashtra",
  "districtName": "Pune",
  "address": " 67 1B 3 30 Block Sector Gokul Road Opposite Viman city, District Pune, Pune City",
  "pincode": "411015",
  "profilePhoto":
"/9j/4AAQSkZJRgABAgAAQABAAD/2wBDAAgGBgcGBQgHBwcJCQgKDBQNDAsLDBkSEw8UHRofHh0aHBwgJC4nICIsIxwcKDcpLDAxNDQ
```

Key: Authorization

Value: Bearer<Leave Space><Your Access Token goes here>

1. Match Mobile number with Aadhaar registered mobile number.

Note:

The mobile number must be sent in encrypted form using the **RSA/ECB/PKCS1Padding** algorithm. Fetch the public key from the auth certificate API (v4/int/api/v1/auth/cert), use it to encrypt the mobile number with the required padding, and pass the encrypted value in the request body.

Method	Post
URL	https://apihpspsbx.abdm.gov.in/v4/int/v2/registration/aadhaar/demographicAuthViaMobile
Request Body	<pre>{ "txnId": "38022xxxx-745c-43xx-91ff-4471a25e9xxx", "mobileNumber": "xxxxxROoEcsYJ41g2wdkicsI7mT1ATCP347iqwBhWbfaEIgZ03/WHAYvDHRG2WX14HB NuP2orD+3O75pN0xFhOz4oLXrePAxKTLK8uG5jdeAiGE21KwOrShq9/gg+ /EwpY4u32kDzv5i1K/s+A7FNVwXqZS5AK2BadEhG5drSRk7P83eFxJZU1wtsvDK6iipOsM4VtMrDkZyszv3 7JppSiYRMFBOyKN+VErG1EdTkoRHJORYLszKcea6X+8RySQcYA3K0oDZNSrBrQmkG9e+iGIxxxxx" }</pre>

Sample Response
<pre>{ "verified": true, "errorCode": null, "reason": null, "uidaiToken": null }</pre>

2.1 HPRID Generate Mobile OTP

Note : If demographicAuthViaMobile failed or response is false . Then Mobile OTP Flow to verify mobile number.

Call this API first, then check **demographicAuthViaMobile** status. If demographic authentication is true, the system verifies the mobile number automatically, so OTP verification isn't needed, and users can go straight to the **createHpid** API. This streamlines the workflow by skipping OTP generation and verification. If demographic authentication is false, trigger the verify OTP API as well.

To generate OTP via mobile number. Please enter Mobile Number and the transaction ID (txnId) received from the HPRID Generate OTP API Response in payload.

Add the accessToken received from the **HPRID Gateway Token** API for authorization.

Note: Append tokenType Bearer before the access token, give a space and then add your access token as shown below.

Key: Authorization

Value: Bearer<Leave Space><Your Access Token goes here>

Request type	POST
URL	https://apihspsbx.abdm.gov.in/v4/int/v1/registration/aadhaar/generateMobileOTP
Request Body/Payload	<pre>{ "mobile": "9999999999", "txnId": "38022xxxx-745c-43xx-91ff-4471a25e9xxx" }</pre>

Response: Previously generated Transaction ID will be returned in this response. **Sample Response**

<pre>{ "txnId": "38022xxxx-745c-43xx-91ff-4471a25e9xxx", "mobileNumber": null }</pre>

2.2 HPRID Verify Mobile OTP

To Verify the OTP generated from the previous API.

Please enter the OTP received on Mobile Number and the transaction ID (txnId) received from the **HPRID Generate OTP** API Response in payload.

Add the accessToken received from the **HPRID Gateway Token** API for authorization.

Note: Append tokenType Bearer before the access token, give a space and then add your access token as shown below.

Key: Authorization

Value: Bearer<Leave Space><Your Access Token goes here>

Request type	POST
URL	https://apihspsbx.abdm.gov.in/v4/int/v1/registration/aadhaar/verifyMobileOTP
Request Body/Payload	<pre>{ "otp": "WnRAcOd4xF/Lp6bNgepKqtR0DODIlz67DVUMgK8gP4pG8dAfnMKku4/7IyNua5VbxzusVUCWF2QusrkrBvclV75TdnYXys9mOU4P6ykRJaFkpL5lECc3lxEMdMyk2emCoQHGWtZrRlSoU9Mc+Bo7fUysTGvyoxEB6Z7OwFcsALrEgTVqBhOPYmWoiZAlXOrj5GTswNu4Uwe29fSm4D7oFpV2FmGCXLxOFX+pku6Q9C2PxiFv6lSa57iLBUBiVU4bsEMAPsK94ey4HN3Q==", "txnId": "38022xxxx-745c-43xx-91ff-4471a25e9xxx" }</pre>

Response: Previously generated Transaction ID will be returned in this response.

Sample Response

```
{
  "txnId": "38022xxxx-745c-43xx-91ff-4471a25e9xxx",
  "mobileNumber": null
}
```

3 Get Suggestion of username from HPRID

Please enter the transaction ID (txnId) received from the **HPRID Generate OTP** API Response in payload.

Add the accessToken received from the **HPRID Gateway Token** API for authorization.

Note: Append tokenType Bearer before the access token, give a space and then add your access token as shown below.

Key: Authorization

Value: Bearer<Leave Space><Your Access Token goes here>

Request type	POST
URL	https://apihpsbx.abdm.gov.in/v4/int/v1/registration/aadhaar/hpid/suggestion
Request Body/Payload	<pre>{ "txnId": "38022xxxx-745c-43xx-91ff-4471a25e9xxx" }</pre>

Sample Response

```
{
  "test1993",
  "test1",
  "kumar1993",
  "test.kumar",
  "testk1993"
}
```

4 Create HPRID

To generate HRPID. Please enter the user details in payload.

Add the accessToken received from the **HPRID Gateway Token** API for authorization.

Note: Append tokenType Bearer before the access token, give a space and then add your access token as shown below.

Key: Authorization

Value: Bearer<Leave Space><Your Access Token goes here>

- Encryption of email and password. If Using the Version V4 API
- Get Public certificate from <https://apihspsbx.abdm.gov.in/v4/int/api/v1/auth/cert>
- After receiving public certificate user needs to encrypt OTP with the public key using RSA Encryption Algo RS512. RSA Encryption to encrypt the data. Cipher Type - RSA/ECB/PKCS1Padding. online tool to encrypt data <https://www.devglan.com/online-tools/rsa-encryption-decryption>

Category code used to createHPR Id api:

Category Code	Category Name
1	Doctor
2	Nurse
6	Pharmacist

Subcategory code used to createHPR Id api:

Sub-Category- Code	Sub-Category-Name	Hpr_Type
1	Modern Medicine	doctor
2	Dentist	doctor
3	Ayurveda	doctor
4	Unani	doctor
89	Sowa-Rigpa	doctor
5	Siddha	doctor
6	Homoeopathy	doctor
7	Registered Auxiliary Nurse Midwife(RANM)	nurse
9	Registered Nurse and Registered Midwife (RN & RM)	nurse
10	Registered Lady Health Visitor (RLHV)	nurse
8	Registered Nurse (RN)	nurse
220	Yoga and Naturopathy	doctor
33	Pharmacist	Pharmacist

Roles:

Role	Name
1	Healthcare Professional
2	Facility Manager
3	Healthcare Professional and Facility Manager

  "firstName": "User FirstName",
}
```

FieldName	Mandatory	Datatype	Size	Comments
txnId	Yes	string		
email	Yes	varchar		
idType	No	string		(Ex. hpr_id)
domainName	Yes	varchar		(Ex. @hpr.abdm)
firstName	Yes	varchar		
middleName	No	string		
lastName	No	varchar		
hprId	Yes	string		From suggestion api
password	Yes	string		
profilePhoto	Yes	string		
sourceType	No	varchar		
hpCategoryCode	Yes	int		Doctor,nurse and pharmacist (1,2,6)
hpSubCategoryCode	Yes	int		
clientId	No	string		
stateCode	No	string		Iso_code from master data
districtCode	No	varchar		Iso_code from master data
council	No	boolean		
role	Yes	int		From master data

Note: Please enter valid Password which has at least one lower case alphabet, an upper case alphabet, a special character, not conjugate digit or alphabet, does not contain first or last name and minimum length 8 characters.

5. Search Facility API

This API will provide you with a list of facilities present in the HFR system based on the search criteria. It returns the basic details of the facilities like Facility Id, Name, demographic details, etc.

Please note:

- You can either search for a particular facility, by sending in the facility Id, or with search criteria.
- If you search with facility Id, then other search parameters will not be considered.
- If a search is performed without a facility id, then you must pass in all the required parameters for a successful search.
- The data needs to be passed in the required format as mentioned for each field.
- Certain demographic details need to be filled in as LGD Codes (Local Government Directory). Please visit. <https://lgdirectory.gov.in/> for more information.
- The API performs fuzzy match on facility name and exact match on all the other attributes.
- It returns the result in pagination format. By default, it will return the first page consisting of 10 records unless specified otherwise.
- Please note this API is to be used to find the facilities registered, so that no duplicate facilities are created by the other APIs.

Parameters:	Required	Description	Data type	Format if any
-------------	----------	-------------	-----------	---------------

ownershipCode	Yes (if facility Id not present)	Ownership of the facility to be searched	String	Accepted codes as specified in get-master- data API with type='OWNER'
stateLGDCode	Yes (if facility Id not present)	State of the facility. The value should be from LGD	String	LGD Code
districtLGDCode	No	District of the facility. The value should be from LGD	String	LGD Code
subdistrictLGDCode	No	Sub district of the facility. The value should be from LGD	String	LGD Code
pincode	No	Pin code of the facility. This needs to be a valid 6 digit value.	String	6-digit number
facilityName	Yes (if facility Id not present)	Name of the facility being searched. This value can be either full or partial name	String	Alphanumeric string
facilityId	No	12-character Facility Id allotted to each facility at the time of submission. If this value is present in search call, then only the respective facility details will be returned.	String	Id generated by HFR system.
page	No	The page number of which results need to be seen. Default value is 1	integer	Integer number
resultsPerPage	No	Number of facilities what will come in one page. Default value is 10.	integer	Integer number

Add the accessToken received from the HPRID Gateway Token API for authorization.

Note: Append **tokenType** Bearer before the access token, give a space and then add your access token as shown below. **Key:** Authorization

Value: Bearer<Leave Space><Your Access Token goes here>

6. Register Professional

To Register doctor/nurse/pharmacist.

Please enter the user details in payload.

Add the token received from **createHprIdWithPreVerified** response under **hprToken** field in the payload. Add the accessToken received from HPRID Gateway Token API for authorization.

When the user's work type is Government or Both, then Central and State options become available. If the user selects Central, they must choose a ministry from the dropdown, and it is mandatory for the central user. **Please refer the master api for getAllMinistry to get ministry data.** Once you have the HPR Id and the password is set, head to the swagger page of HPR Id <https://apihpsbx.abdm.gov.in/v4/int/swagger-ui/index.html?urls.primaryName=HPR#/> Expand the "Authentication" tab and select "/v1/auth/authPassword" API. Please fill in the request body and execute this API. Save the "token" returned in the response as it will be used in header of HPRs create API.

Note: Append tokenType Bearer before the access token, give a space and then add your access token as shown below.

Key: Authorization

Value: Bearer<Leave Space><Your Access Token goes here>

Qualification code used to register/update professional api (name Of Degree/Diploma Obtained) :

Degree Code	Degree Name	System Of Medicine
4060	MBBS – Bachelor of Medicine and Bachelor of Surgery	Modern Medicine
4074	BDS - Bachelor of Dental Surgery	Dentistry
4079	BAMS - Bachelor of Ayurvedic Medicine and Surgery	Ayurvedic
4082	BUMS - Bachelor of Unani Medicine & Surgery	Unani
61	BSMS - Bachelor of Siddha Medicine and Surgery	Siddha
74	BTMS - Bachelor of Tibetan Medicine Studies	Sowa-Rigpa
40	BHMS - Bachelor of Homoeopathic Medicine and Surgery	Homoeopathy

9568	BPHARM- Bachelor of Pharmacy	Pharmacist
------	------------------------------	------------

Category code used to register/update professional api(Category):

Category Code	Category Name
1	Doctor
2	Nurse
6	Pharmacist

Subcategory code used to register/update professional api(CategoryId):

Sub-Category- Code	Sub-Category-Name	Hpr_Type
1	Modern Medicine	doctor
2	Dentistry	doctor
3	Homoeopathy	doctor
4	Ayurveda	doctor
5	Unani	doctor
6	Siddha	doctor
7	Sowa-Rigpa	doctor
8	Registered Auxiliary Nurse Midwife(RANM)	nurse
9	registered nurse (RN)	nurse
10	Registered Nurse and Registered Midwife (RN & RM)	nurse
11	Registered Lady Health Visitor (RLHV)	nurse
13	Pharmacist	Pharmacist
14	Yoga and Naturopathy	doctor

Request type	POST
URL	https://apihspsbx.abdm.gov.in/v4/int/apis/v1/doctors/register-professional-new

Please note that you need to specify doctor or nurse in the healthProfessionalType field for the respective registration. If sent empty or wrong data, then the request will be considered as invalid.

Note:

Doctor (Healthcare Professional) Flow

- **SMD ID** is used **only to identify Doctors**. This identifier is specific to doctors and should not be applied to other healthcare professionals.
- When searching for colleges using **SMD**, the search works correctly for doctors, allowing accurate identification and retrieval of relevant information.
- This logic is **not applicable for Nurses**. The SMD ID does not play a role in nurse identification or search processes.

Nurse Flow (Important)

- For nurses, the system **does not check Nurses based on SMD ID**. The SMD ID is not considered during nurse searches.

- If an attempt is made to search for nurse colleges using **SMD**, the **college/university name will appear as null**.
This is expected and indicates that the SMD ID is not a valid identifier for nurses.
- For nurses, **SMD will always be null** as it is not intended or used for nurse identification.

If the user's work type is Government or Both

    "referenceNumber": "8806aa4a-013b-xxxx-8839-1f0878dxxxx",
    "status": "true",
    "message": "Congratulations! Your profile has been submitted successfully for verification.",
    "error": null,
    "hprId": "71-3563-6824-xxxx"
  },
  "statusCode": "OK",
  "statusCodeValue": 200
}
```

NOTE:

The Base64 string in the above payload is just a sample. You'll need to convert your own file to Base64 and use that value in the request.

Note: When chooseWorkStatus is set to **Government (1)** or **Both (2)**, the category field within the personalInformation object becomes mandatory and must be populated according to the government type as follows: and in case of private please pass empty ,as category field is mandatory.

Government Type	Required category Value
Central	"C"
State	"S"
If (chooseWorkStatus)=0, in case of private.	"" pass it empty(required)

Note : In case of ["chooseWorkStatus": "1", "chooseWorkStatus": "2"] ["facilityDeclarationData":{...}] is mandatory; please refer the sample tab for govt tab on to see facility declaration.

Example

```
"currentWorkDetails": {
  "currentlyWorking": "1",
  "purposeOfWork": "practice",
  "chooseWorkStatus": "0",
  "reasonForNotWorking": "",
  "certificateAttachment": ""
}
```

Note: In case registered healthcare professionals is doctor and ["isPermanentOrRenewable": "Renewable"] then ["renewableDueDate"] is mandatory, if health professional choose ["isPermanentOrRenewable": "Permanent"] then ["renewableDueDate"] is not mandatory.

If healthcare professionals is **nurse** then **isPermanentOrRenewable** and **renewableDueDate** is not required.

Example

```
"registrationData": [
  {
    "registeredWithCouncil": "7",
    "registrationNumber": "123455",
    "registrationCertificate": "",
    "isNameDifferentInCertificate": "0",
    "proofOfNameChangeCertificate": "",
    "registrationDate": "2023-02-15",
    "isPermanentOrRenewable": "Renewable",
    "renewableDueDate": "2023-02-15",
    "categoryId": "1"
  }
]
```

FieldName	Mandatory	Datatype	Size	Comments
hprToken	Yes			Accesstoken from Create HPRID Api or login apis.refer the 3 rd pdf (update api documentation.)
profilePhoto	Yes	varchar		
healthProfessionalType	Yes	String		doctor/nurse/pharmacist
officialMobileCode	No	varchar	5	
officialMobile	Yes	varchar	10	
officialMobileStatus	No	Int	1	(0,1) as accepted value
officialEmail	No	varchar		
officialEmailStatus	No	Int	1	(0,1) as accepted value
visibleProfilePicture	No	Int	1	
Salutation	Yes	Int	1	
firstName	Yes	String		
middleName	No	String		
lastName	No	String		
fatherName	No	String		
motherName	No	String		
spouseName	No	String		

Nationality	Yes	varchar		Id from masterdata – refer Countries sheet
-------------	-----	---------	--	--

				Api endpoint- apis/v1/masters/countries/{country_id}
placeOfBirthState	No	varchar		Iso_code from master data Eg- apis/v1/masters/states
District	No	varchar		Iso_code from master data Eg- apis/v1/ masters/district/{state_id}
subdistrict	No	varchar		Iso_code from master data Eg- masters/sub-districts/{district_id}
City	No	varchar		Iso_code from master data
languagesSpoken	Yes	varchar		Ex: "1,5" - if two languages spoken. "1" - if one language spoken For Codes Refer Master Data eg- masters/languages/{language_id}
isCommunicationAddressAs PerKYC	No	Int	1	(0,1) - No 1 - Yes If isCommunicationAddressAsPerKYC is 0 then address related fields under communication address are mandatory. If isCommunicationAddressAsPerKYC is 1 then fields under communication address are non - mandatory.
Address	Yes	Text		
Name	Yes	varchar		
Country	Yes	Int	10	Id from masterdata
State	Yes	int	10	Iso_code from master data state apis .
District	Yes	int	10	Iso_code from master data district apis
Subdistrict	No	int	10	Iso_code from master data
City	No	int	10	Iso_code from master data
Pincode	Yes	int	10	
publicMobileNumber	No	varchar	10	
publicMobileNumberCode	No	varchar	5	
publicMobileNumberStatus	No	Int	1	(0,1) as accepted value

landLineNumber	No	varchar	10	
landLineNumberCode	No	varchar	5	
publicEmail	No	varchar		
publicEmailStatus	No	int	1	(0,1) as accepted value
Category	Yes	int	10	Doctor category code/ category master data apis. Ex:doctor - 1
registeredWithCouncil	Yes	varchar		Id from master data
registrationNumber	Yes	varchar		
registrationCertificate	No	varchar		Refer Attachments section for detailed description
isNameDifferentInCertificate	No	int		(0,1) as accepted value
proofOfNameChangeCertificate	No	varchar		If isNameDifferent I Certificate is 1 then this field is mandatory Refer Attachments section for detailed Description
categoryId	Yes	int	10	Doctor sub category code/ from system of medicine master data apis. Ex : Modern Medicine – 1
nameOfDegreeOrDiplomaObtained	Yes	int	10	Id from Master data Eg. v1/masters/courses apis.
Country	Yes	int	10	Id from master data
State	Yes	int	10	Iso_code from Master data
College	Yes	int	10	Id from college master Data For “Any Other” Send 0.

university	Yes	int	10	Id from master Data For “Any Other” Send 0.
monthOfAwardingDegreeDiploma	No	varchar		
yearOfAwardingDegreeDiploma	Yes	Date		
degreeCertificate	No	varchar		

isNameDifferentInCertificate	No	int		(0,1) as accepted value – No - yes
proofOfNameChangeCertificate	No	varchar		If isNameDifferentInCertificate is 1 then this field is mandatory Refer Attachments section for detailed description
dateOfBirth	Yes	String		
Gender	Yes	String		

currentlyWorking	Yes	int	1	(0,1) as accepted value – No – Yes
purposeOfWork	Yes	string		Refer nature of work from master data "Administrative, Teaching, Practice"
chooseWorkStatus	Yes	int	1	(0,1,2) -private -government only - both
reasonForNotWorking	Yes	string		currentlyWorking is 0 then this field is mandatory other wise pass this field empty.
certificateAttachment	No	varchar		Refer Attachments section for detailed description
facilityId	No	varchar		Facility ID
facilityName	No	varchar		If facilityId not provided, then facilityName will be mandatory
facilityAddress	No	varchar		If facilityId not provided, the facilityAddress will be mandatory
facilityPincode	No	varchar		If facilityId not provided, then facilityPincode will be mandatory
State	No	int	10	Iso_code from master data, If facilityId not provided, then state will be mandatory
district	No	int	10	Iso_code from master data, If facilityId not provided, then district will be mandatory
facilityType	No	varchar		If facilityId not provided, then facilityType will be mandatory
facilityDepartment	No	varchar		If facilityId provided, then facilityDepartment and Facility Designation will be mandatory
facilityDesignation	No	varchar		If facilityId provided, then facilityDepartment and Facility Designation will be mandatory
isPermanentOrRenewable	No	Boolean		If healthProfessionalType is doctor then this is mandatory
renewableDueDate	No	DateTime		If isPermanent Or Renewable is Renewable then you need to input due date
profileVisibleToPublic	No	Int	1	If health professional wants to display in public, then set to 1

ministry	No	String		If selecting chooseWorkStatus as Government or both then its mandatory. Data will come from getAllMinistry api from master.
Category	No	int		If selecting chooseWorkStatus as Government or both then its mandatory. Category from personal information will be C for Govt/Central and S for state

Note: Mandatory Fields in Payload Submission

It is essential that all the fields mentioned above are included in the payload during submission. Each field is required and must be provided to ensure proper processing.

Attachments:

Kindly refer below for sending attachments in the registerProfessional Payload. Below is the json Format for sending attachments

```
{
  "fileType": <file type>,
  "data": <base64 encoded data>
}
```

Fields Description

“filetype” - Possible values for fileType field are mentioned below

- ‘image/jpeg’
- ‘image/png’
- ‘certificate.pdf’

“data” – please send the respective attachment in base64 encoded format

NOTE:

- Please refer the below site where you can base64 encode your image online.

<https://www.base64-image.de/>

Examples:

```
"registrationCertificate"
  "fileType" "jpeg" ,
  "data" "\/9j/4AAQSkZJRgABAQAAQABAAQ/"
},
"degreeCertificate"
  "fileType" "png" ,
  "data" "\/9j/4AAQSkZJRgABAQAAQABAAQ/"
},
```

Note: In case user have international qualification that we can add in additional qualifications (in the qualification dto only). Ex.

```
{
  "nameOfDegreeOrDiplomaObtained": "Graduation",
```

```

        "country": "United States Of America",
        "state": "united",
        "college": "united School",
        "university": "united University",
        "yearOfAwardingDegreeDiploma": "2024",
        "monthOfAwardingDegreeDiploma": "February",
        "degreeCertificate": { "fileType": "pdf",
        "data":

```

7. Retrieve Professional Document List API

Users will get all the document list with their identifier which can be used in upload document API mentioned below.

Add the accessToken received from the **HPRID Gateway Token** API for authorization.

Note: Append tokenType Bearer before the access token, give a space and then add your access token as shown below.

Key: Authorization

Value: Bearer<Leave Space><Your Access Token goes here>

Method	Post
URL	https://apihpsbx.abdm.gov.in/v4/int/apis/v1/doctors/fetch-documents-list
Request Body	<pre>{ "hprid": "71-9999-9999-1358" }</pre>

Sample Response

8. Upload Documents API

Note:

1. Append tokenType Bearer before the access token, give a space and then add your access token as shown below
2. Append token in Request body as hpr_token.
3. degreeCertificate, registrationCertificate are mandatory document types.
4. If Health professional is of government type or both then proofOfWorkCertificate is required.

Key: Authorization

Value: Bearer<Leave Space><Your Access Token goes here>

Key: hpr_token

Value: <Your HPRID Login Via Password API Auth Token goes here>

Method	Post
URL	https://apihspbx.abdm.gov.in/v4/int/apis/v1/uploads/upload-document
	<pre>{ "hpr_token": "<access token>", "document":[{ "document_id": ****, "document_type": "profilePhoto", "fileType":<file type>, "data": "<base64 encode string>" }, { "document_id": ****, "document_type": "degreeCertificate" , "fileType": "<file type>", "data": "<base64 encode string>" }, { "document_id": ****, "document_type": "registrationCertificate", "fileType":<file type>, "data": "<base64 encode string>" }, { "document_id": ****, "document_type": "proofOfWorkCertificate", "fileType":<file type>, "data": "<base64 encode string>" },], }</pre>

Sample Response

```

{
  "profilePhoto": {
    "status": "pass",
    "msg": "Profile pic has been uploaded."
  },
  "degreeCertificate": { "status": "pass",
    "msg": "Degree certificate updated"
  },
  "registrationCertificate": { "status": "pass",
    "msg": "Registration certificate updated"
  },
  "proofOfWorkCertificate": { "status":
    "pass",
    "msg": "Work proof certificate updated"
  }
}

```

Field Name	Mandatory	Datatype	Size	Comments
hpr_token	Yes			Access token from HPRID login API (eg. AuthPassword apis)
document_id	Yes	int		Identifier from Retrieve Professional detail api for the respective detail
document_type	Yes	varchar		
Data	Yes	varchar		Base64 encode string of file

File size should not exceed 1 mb for profile photo and 5 mb for other documents and supported document types are png, jpeg, jpg, pdf.

Supported document types are profilePhoto, degreeCertificate, registrationCertificate, proofOfWorkCertificate, proofOfNameChangeRegCertificate, proofOfNameChangeQualCertificate.

Document Type	Identifier (Get Professional Details)
profilePhoto	Parent Identifier
degreeCertificate	Qualification block identifier
registrationCertificate	Registration block identifier
proofOfWorkCertificate	Parent Identifier
proofOfNameChangeRegCertificate	Registration block identifier
proofOfNameChangeQualCertificate	Qualification block identifier
